

SHAKE WELL BEFORE USE

Rustins Advanced Coloured Wood Preserver is a water based, low odour, non-flammable product based on optimised formulation technology. The ultra-fine particle size allows deep penetration of the preserver to take place so the performance of the product is much greater than standard wood preserver products. It is non-flammable, quick drying and can be applied to wet or dry timbers. For use against wood rotting & staining fungi and surface growths within domestic, commercial, institutional and industrial premises on timber out of ground or surface water contact.

Preparation

Ensure that timber surfaces are clean and free from previous coatings, grease and contaminants. Surfaces may be damp but the preserver should not be applied to decayed wood which will need to be removed and replaced.

Application

Shake well and stir before use. Apply two coats using a brush or coarse spray. Depending on the drying conditions, the second application should be applied before the first is dry. Each extra coat will make the colour deeper

Ensure all end grain is thoroughly soaked as this is especially prone to water ingress and resulting decay.

Re-coating Time

Temperature and humidity will affect the rate of drying. It is important that after the first application the surface is not allowed to dry out and ideally should be damp when the second application is carried out. The timber should be allowed to dry for 48 hours before over-coating.

Coverage

For preventative effect against wood rotting & staining fungi and surface growths

1L will cover approximately 5 sq.m.

For preventative effect wood rotting & staining fungi and surface growths. 1L will cover approximately 5 sq.m.

Cleaning

Remove as much product as possible and return to this container. Brushes should then be cleaned immediately with water.

Disposal (pollution prevention)

Some local authorities have special facilities for disposal of waste paints/varnishes/coatings. Do not empty product into drains or watercourses.

Storage

Store in a cool dry place with the lid tightly closed. Use within 2 years of manufacture. Protect from frost.

Precautions

Not to be used in and near food preparation area. Avoid contact with non-absorbing surfaces like plastics, metal, bitumen and roofing felts. If in doubt, contact our technical department.

The colour illustrated on the tin is a guide only. Please try on inconspicuous area before proceeding with the whole job.

HEALTH & SAFETY

Harmful to aquatic life with long lasting effects.

Contains IPBC & 1,2-benzisothiazol-3(2H)-one. May produce an allergic reaction.

Wash hands and exposed skin thoroughly after handling.

Keep out of reach of children.

Avoid release into the environment. Collect Spillage.

Dispose of empty container in household waste.

Dispose of contents as hazardous waste in accordance with local / regional / national / international regulations.

Use within 2 years of manufacture. Protect from frost.

If medical advice is needed, have product container or label at hand.

Read label before use.

Contains : IPBC 0.75%
