

# Rustins Rust Converter

- *Ready to use*
- *Inhibits and neutralises rust*
- *Seals out moisture to prevent future rusting*
- *Water-based*

## Rust Converter wipes out rust.

Stabilises the surface and forms a protective coating once dry. It will form a barrier against water vapour, oxygen and carbon dioxide. It resists salt spray and bacterial growth.

### STIR WELL BEFORE USE

**Preparation:** The surface must be clean, dry and free from oil or grease. Remove old paint, loose rust with steel wool or wire brush. If paint is difficult to remove use Rustins Strypit Paint and Varnish Stripper.

**Application:** Shake bottle well before use. Pour the required amount needed into a plastic container. Brush a thin coat directly onto rusty areas only, working well into any pitted areas, corners and edges. Ensure that exposed corners and edges are well treated to avoid any chance of rust creep beneath.

**Re-coating time:** Rustins Rust Converter will turn any treated areas blue-black as it reacts with the rust. If the area treated doesn't change colour then re-apply after 30 minutes. There is no need to rinse off the first treatment. Apply topcoat after a minimum 3 hours. For best results, paint the same day. Always test on a small area for compatibility.

**Coverage:** 6-8 sq. m per litre depending on the absorbency of the surface

**Cleaning:** Do not return excess Rust Converter to this container. Brushes should then be cleaned immediately with water. If the brushes become hard, they may be cleaned with Rustins Brush Restorer or Rustins Cellulose Thinners.

**Disposal (pollution prevention):** Some local authorities have special facilities for disposal of waste paints/varnishes /coatings. Do not empty product into drains or watercourses.

**Storage:** Store in a cool dry place with the lid tightly closed. Protect from frost.

Please refer to Product Data Sheet for full information at [www.rustins.co.uk](http://www.rustins.co.uk)

## HEALTH AND SAFETY

### WARNING

### CAUSES SERIOUS EYE IRRITATION

Wash exposed skin thoroughly after handling.

Wear protective gloves / protective clothing / eye protection / face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention.
